R.S. 43:31.

2004 MSP 86/279

ORDER OF RECLASSIFICATION OF
MOLLUSCAN SHELLFISH WATERS IN LOUISIANA

Pursuant to the provisions of LSA - R.S. 40:5.3, as amended and re-enacted by Act 1 of the First Regular Legislative Session of 1988, all Louisiana molluscan shellfish (oysters, clams, mussels) growing areas designated as "open" on the attached map are hereby "opened" to the harvest of shellfish from May 1 through August 31, 2004.

1. All Louisiana molluscan shellfish growing areas designated as "closed" on the attached map are hereby "closed" to the harvest of molluscan shellfish from May 1 through August 31, 2004.
2. This action is being taken as a result of bacteriological data collected and analyzed during this period, for the past 5 years, as well as supplemental studies which may be available.
3. When buoys or other field markers are used to delineate the opened/closed line or the boundary of a conditional management area of shellfish harvesting areas, the opened/closed line or boundary of the conditional management area, as depicted on the map, indicates the approximate position of the opened/closed line or boundary. The opened/closed line or boundary of the conditional management area, for enforcement purposes is as identified by the buoys or field markers.
4. When buoys or field markers are used to delineate the opening/closing line of shellfish harvesting waters or the boundary of a conditional management area, removing or relocation of the buoys or field markers may result in the closure of the harvesting area until such time as the proper boundary position can be determined.
5. Areas designated as conditional management areas are regulated by classification orders separate from the seasonal reclassification orders for molluscan shellfish. Therefore, it is the responsibility of the shellfish harvester to fully familiarize himself with the requirements regulating the opening and closing of shellfish harvesting waters designated as conditional management areas (CMA) prior to harvesting shellfish within such a designated area.
6. The presence of marine biotoxins, in excess of established tolerances, will result in the immediate closure of an area until such time as the absence of the biotoxin is established.
7. A fifty (50) yard (150 ft.) closure, from the point of waste discharge, exists for all man-made habitable structures.
8. Closures, as required to protect public health, may be ordered by the State Health Officer.
9. Closures may be ordered as requested by the Secretary of the Louisiana Department of Wildlife and Fisheries.
10. It is the responsibility of the shellfish harvester to ascertain the position of the opening/closing line or the boundary of a conditional management area prior to harvesting activities.
11. The effective date of this order is official sunrise May 1, 2004.
12. This order will become invalid at official sunset August 31, 2004.

So Ordered this 9th day of March, 2004.

Dr. Jimmy Guidry, M.D.
State Health Officer

Date

Frederick P. Cerise, M.D., M.P.H.
Secretary
Department of Health and Hospitals

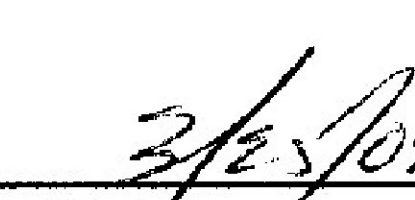

Date

This action is to certify that the Louisiana Department of Wildlife and Fisheries, Enforcement Division Personnel, have reviewed the opened/closed line and have determined that it is enforceable and will cite anyone fishing within the closed area under R.S. 56:424, E1.

Dwight Landreneau
Secretary
Department of Wildlife and Fisheries

Title:

May-August 2004 Re-Classification Line - Frame 12 (Map ID: 2004MSP86/279)

Geospatial_Data_Presentation_Form: map

Online_Linkage: [webpage]

Description:

Abstract:

This map is the official record of the Molluscan Shellfish Program's seasonal classification and was used to enforce shellfish harvest during the designated season-year unless otherwise amended by official notice.

Shellfish growing waters occur throughout much of the Louisiana coastline. To cover this large expanse at a moderate scale, the coastal area has been segmented into 14 map frames. For each seasonal reclassification, 14 maps frames are produced. Accordingly, each seasonal reclassification map set will consist of 14 metadata records that are identical except for their spatial extent.

Purpose:

The seasonal re-classification lines identify areas that are open or closed for harvest of

shellfish during the designated season-year.

Access_Constraints:

It is strongly recommended that this data is directly acquired from the distributor described above or from another distributor authorized by the Louisiana Department of Health and Hospitals and not indirectly through other sources which may have changed the data in some way. The distributor makes no claims as to the data's suitability for other purposes.

Use_Constraints:

Acknowledgement of the Louisiana Department of Health and Hospitals Molluscan Shellfish Program as a data source would be appreciated in products developed from these

data, and such acknowledgment as is standard for citation and legal practices for data source is expected by users of this data. Users should be aware that comparison with other data sets for the same area from other time periods may be inaccurate due to inconsistencies resulting from changes in mapping conventions, data collection, and computer processes over time. The distributor shall not be liable for improper or incorrect use of this data, based on the description of appropriate/inappropriate uses described in this metadata document. These data are not legal documents and are not to be used as such. This map is not intended for navigational purposes.

Distribution_Liability:

The data herein, including but not limited to geographic data, tabular data, analytical data, electronic data structures or files, are provided "as is" without warranty of any kind, either expressed or implied, or statutory, including, but not limited to, the implied warranties or merchantability and fitness for a particular purpose other than the purpose stated herein.

The user assumes the entire risk as to the quality and performance of the data. No guarantee of accuracy is granted, or is any responsibility for reliance thereon assumed. In no event shall the Louisiana Department of Health and Hospitals (LDHH) be liable for direct, indirect, incidental, consequential or special damages of any kind, including, but not limited to, loss of anticipated profits or benefits arising out of use of or reliance on the data.

The LDHH does not accept liability for any damages or misrepresentation caused by inaccuracies in the data or as a result of changes to the data caused by system transfers or other transformations or conversions, nor is there responsibility assumed to maintain the data in any manner or form. These data have been developed from the best available sources. Although efforts have been made to ensure that the data are accurate and reliable, errors and variable conditions originating from physical sources used to develop the data may be reflected in the data supplied. Users must be aware of these conditions and bear responsibility for the appropriate use of the information with respect to possible errors, scale, resolution, rectification, positional accuracy, development methodology, time period, environmental and climatic conditions and other circumstances specific to these data. The user is responsible for understanding the accuracy limitations of the data provided herein. The burden for determining fitness for use lies entirely with the user. The user should refer to the accompanying metadata notes for a description of the data and data development procedures. Although these data have been processed successfully on computers at the LDHH, no guarantee, expressed or implied, is made by LDHH regarding the use of these data on any other system, nor does the act of distribution constitute or imply any such warranty. Distribution of these data is intended for information purposes and should not be considered authoritative for navigational, engineering, legal and other site-specific uses. It is also strongly recommended that careful attention be paid to the contents of the metadata file associated with these data. Any downloading and use of these data signifies a user's agreement to comprehension and compliance. Insure all portions of metadata are read and clearly understood before using these data.
